Valid for: 3 YEARS

Cost: £160 ex VAT **NON-MEMBER:** £220 ex VAT

Safe Use of Oxygen/Fuel Cutting Course Details

The course teaches candidates to understand, reduce and eliminate the risk involved in using the tools and to be aware of safe systems of work as well as a control measure.

Recent changes to guidance from HSE has classified cutting and welding fumes as a known carcinogenic.

For this reason, all attendees attending this course are required to bring:

Ori-Nasal tight-fitting face mask complete with ABEK1 filter and a copy of the associate face fit test
Alternatively, bring with them their powered air respirator system such as 3M Versaflow or equivalent
Safety Boots
Flame Retardant Overalls
Goggles (Shade 5 and clear)
Gauntlets

This Course Covers:

Health and Safety legislation
Equipment
Accidents
Simple risk assessment
Hazards

Safe working
Confined Spaces
Precautions

This course requires candidates to be clean-shaven to ensure the correct fitting of PPE equipment.

Who should attend

 All experienced operatives involved in the use of Oxygen/Fuel Cutting Equipment within the Demolition Industry. Those with little or no experience will require assessment by the trainer to identify the extent of the training required.

Course assessment and certification

NDTG Certificate.
