

Demolition Site Safety courses ensure the safety of all non-demolition workers who visit sites.

Course Summary

Certification: 

Duration: 1 DAY

Valid for: 3 YEARS

Cost: £135 ex VAT **NON-MEMBER:** £185 ex VAT

Demolition Site Safety Details

Safety is paramount on all demolition and construction sites. It is the site supervisor's responsibility to ensure that all workers and visitors adhere to the correct PPE regulations and safety procedures while on-site for work-related activities.

The Demolition Site Safety Course is designed for individuals who need to be on-site for job-related reasons but do not work directly in the demolition sector. These individuals may lack the safety knowledge that demolition workers possess, putting them at a higher risk of accidents. In addition to enhancing site visitors' safety, the Demolition Site Safety Course can streamline the site induction process. For demolition sites that are cautious about whom they allow on-site, this qualification can reduce delays in access and help ensure the safety of all workers, regardless of their background.

This course includes 'Asbestos Awareness' training, which ensures individuals understand the necessary precautions and how to reduce the risk of asbestos exposure.

The Course Covers:

- Legislation & the role of the HSE
- Asbestos Awareness
- Site Inductions
- Site Rules
- Drugs and Alcohol
- Fire, First Aid and Emergencies
- Working Near Plant and Equipment
- Working at Height
- Personal Protective Equipment
- Site Environmental Issues

Who should attend

Any individual who may have to visit a demolition site and perform a non-demolition related task. This could be Journalists, Structural Engineers, Marketing or Photography staff, Chemical Samplers, Hydraulic hose engineers, Health & Safety Auditors or any number of other business functions.
