**Duration:** ½ DAY

**Valid for:** 3 YEARS

**Cost:** £70 **NON-MEMBER:** £100

## **COSHH (Control of Substances Hazardous to Health) Awareness Course Details**

This course is ideal for workers at all levels within an organisation who handle or work in proximity to substances hazardous to health. By the end of this training, participants will possess a comprehensive understanding of COSHH, enabling them to identify potential risks, implement preventive measures, and contribute to a safer work environment conducive to well-being and productivity. This course delves into the crucial aspects of COSHH, focusing on the identification, management, and mitigation of risks of hazardous substances.

### **What's covered:**

- Legislation
- Understanding of COSHH symbols
- How substances can enter the body and the health implications
- The principals of COSHH to remain safe

### **Who should attend**

Any worker interested in workplace health and safety, regardless of their specific job, can benefit from COSHH training to understand potential hazards and contribute to creating a safer work environment.

**Course assessment and certification**

The COSHH (Control of Substances Hazardous to Health) course is assessed with a multiple choice test
